SUMMARY

Product Analyst with hands-on experience driving AI-powered product delivery at a B2B cybersecurity startup. End-to-end Agile owner from discovery and user story writing to sprint delivery and UAT. O-to-1 LLM product builder. Published researcher in Agile methodologies. Targeting APM and Product Analyst roles at high-growth product companies.

EDUCATION

Vellore Institute of Technology – AP
Integrated M.Tech – Computer Science & Engineering

2021 – 2026
CGPA: 7.72 / 10

EXPERIENCE

CoreTek Labs
Product Analyst

Jan 2026 – Present
Hyderabad, India

- Led discovery for a RAG-based cyber assessment platform interviewed 8+ stakeholders, built structured backlog, cut sprint scope changes by ~30%.
- Owned Agile delivery for a 6-member team: sprint planning, backlog grooming, stand-ups and retros across 3 sprints using Jira.
- Wrote 20+ user stories with acceptance criteria; benchmarked 5 rival platforms to inform roadmap priorities with engineering and design.
- Built Power BI dashboards tracking sprint velocity, feature adoption and release health for 5+ senior stakeholders.

The April AI
Project Management Intern

Aug 2025 – Nov 2025
Remote

- Built project tracking systems across 3 workstreams in Google Sheets reduced status-update lag for 10+ stakeholders.
- Standardized reporting templates, cutting ad-hoc status requests by ~40% across 2 concurrent product releases.
- Coordinated UAT for 2 release cycles closed 30+ issues, ensuring zero critical defects reached production.
- Translated technical blockers into business-language reports, enabling faster decisions in weekly stakeholder reviews.

PROJECTS & RESEARCH

Research Paper: Agile Methodologies in Digital Transformation & Product Development | Published at ICoECIT-2026

- Synthesized 40+ academic sources on Scrum, Kanban and XP for enterprise digital transformation — accepted at IEEE Conference.

NCERT Study Tool | AI-Powered EdTech

- Scoped and shipped a full-stack LLM-powered NCERT study assistant from O-to-1 as solo product owner and developer.
- Designed context-aware, curriculum-aligned Q&A architecture for 10th–12th grade students with structured data pipelines.

Quick-Ride | Ride Scheduling & Logistics

- Built a O-to-1 ride scheduling platform handling driver-rider coordination, dynamic queues and logistics workflows.
- Architected scalable infra on Render PostgreSQL, Redis caching, Laravel Horizon worker for async job processing.

SKILLS

Product	Discovery · User Stories · PRD · RoadMapping · Backlog Prioritization · UAT · GTM · Competitive Analysis
Delivery	Agile/Scrum · Sprint Planning · Stakeholder Management · Risk Tracking · Release Management
Analytics	Power BI · Tableau · SQL · Python · A/B Testing
AI & LLM	RAG Systems · LLM Integration · Prompt Engineering · AI Product Management
Tools	Jira · Confluence · Figma · Azure · Git · n8n · Asana · Trello · Microsoft Copilot

CERTIFICATIONS

Microsoft AI Product Manager Professional Certificate

June 2026

Coursera – Microsoft | Enterprise PM · Product Strategy · UX/UI · Azure · Power BI · Copilot · Go-to-Market

CAPM® Exam Prep Seminar

June 2025

PMBOK-based project management principles, process groups, knowledge areas, and documentation standards
