SUMMARY

Product Analyst with hands-on experience driving AI-powered product delivery at a B2B cybersecurity startup. End-to-end Agile owner — from discovery and user story writing to sprint delivery and UAT. 0-to-1 LLM product builder. Published researcher in Agile methodologies. Targeting APM and Product Analyst roles at high-growth product companies.

EXPERIENCE

CoreTek Labs

Jan 2026 – Present

Product Analyst

Hyderabad, India

- Drove product discovery for a RAG-based cyber assessment platform by conducting stakeholder interviews with 8+ business and technical stakeholders, translating ambiguous requirements into a structured product backlog — reducing sprint scope changes by ~30%.
- Owned end-to-end Agile delivery for a 6-member cross-functional team: led sprint planning, backlog grooming, stand-ups, and retrospectives across 3 active sprints using Jira, maintaining consistent sprint velocity.
- Authored 20+ user stories with clear acceptance criteria and conducted competitive benchmarking across 5 rival platforms, directly informing roadmap prioritization with engineering and design leads.
- Built Power BI dashboards to track sprint velocity, feature adoption, and release health — providing real-time product visibility for 5+ senior stakeholders.

The April AI

Aug 2025 – Nov 2025

Project Management Intern

Remote

- Designed and maintained project tracking systems across 3 workstreams using Google Sheets, enabling proactive identification of timeline risks and reducing status-update lag for 10+ stakeholders.
- Standardized cross-team reporting templates, cutting ad-hoc status update requests by ~40% and improving stakeholder communication clarity across 2 concurrent product releases.
- Coordinated UAT for 2 release cycles — tracked and drove closure of 30+ issues, ensuring zero critical defects reached production and release readiness criteria were met on schedule.
- Translated complex technical blockers into business-language progress reports, enabling non-technical stakeholders to make faster, informed decisions during weekly reviews.

PROJECTS & RESEARCH

Research Paper: Agile Methodologies in Digital Transformation & Product Development — Published at ICoECIT-2026 (IEEE)

- Synthesized 40+ academic sources to evaluate Scrum, Kanban, and XP frameworks for scalability in enterprise digital transformation; peer-reviewed and accepted at IEEE Conference.

NCERT Study Tool Python · Flask · JavaScript | AI-Powered EdTech

- Identified an underserved gap in NCERT curriculum tools; scoped and shipped a full-stack LLM-powered study assistant from 0-to-1 as solo product owner and developer.
- Designed product architecture supporting context-aware, curriculum-aligned Q&A for 10th–12th grade students, with structured data pipelines for content parsing and retrieval.

Quick-Ride Laravel · PostgreSQL · Redis | Ride Scheduling & Logistics

- Conceived and built a production-ready ride scheduling platform from 0-to-1, handling driver-rider coordination, dynamic queue management, and logistics workflows.
- Architected scalable infrastructure on Render with PostgreSQL, Redis caching, and a Laravel Horizon worker — enabling async job processing and production-grade reliability.

SKILLS

Product	Discovery · User Stories · PRD · Roadmapping · Backlog Prioritization · UAT · GTM · Competitive Analysis
Delivery	Agile/Scrum · Sprint Planning · Stakeholder Management · Risk Tracking · Release Management
Analytics	Power BI · Tableau · SQL · Python · Google Sheets
AI & LLM	RAG Systems · LLM Integration · Prompt Engineering · AI Product Management · Microsoft Copilot
Tools	Jira · Confluence · Figma · Azure · Git · n8n · Asana · Trello

EDUCATION

Vellore Institute of Technology – AP

2021 – 2026

Integrated M.Tech – Computer Science & Engineering

CGPA: 7.72 / 10

CERTIFICATIONS

Microsoft AI Product Manager Professional Certificate

June 2026

Coursera – Microsoft | Enterprise PM · Product Strategy · UX/UI · Azure · Power BI · Copilot · Go-to-Market
